I have spill pathway maps for the XTO sites, but it doesn't have Townships or distances. I'll have my guys develop these now.

Jose,

Did we have a similar map like this for the East side of I-35, or just the google earth map with push pins?

Subject: RE: NRC's

OCC may have mentioned an estimated volume, but none of their investigation reports for the sites they have visited have a volume.

I've attached the latest map. Shows spill pathway from northern most site (Hewitt Unit 15) to southern most site (Pinkston).

- Distance from Hewitt Unit to Pinkston = 9.34 miles
- Distance from Hewitt Unit to Love County line = 21.1 miles

The map has the township layers. I'll have to see if they can add a section layer as well.
